SUMMARY

Computer Science undergraduate with a strong foundation in programming, web development, and problem-solving. Experienced in building user-focused web applications and developing systems used by 50+ users, with hands-on exposure to real-time data handling and structured application design. Actively participated in hackathons and team-based projects, demonstrating the ability to solve real-world problems under constraints. Interested in pursuing opportunities in **software development and exploring research areas such as algorithms, intelligent systems, and scalable computing.**

EDUCATION

Krishna Institute of Engineering and Technology

B. Tech in Computer science and Information Technology, CGPA: 8.03

Ghaziabad, IN

Aug 2025 – Jul 2029

Delhi Public School

Class XII (PCM) – 81.65%

Meerut, IN

Apr 2024 - Mar 2025

PROJECTS

SMART SPLITTER

- A frontend expense-management platform using React.js, Vite, Tailwind CSS, and Chart.js, integrating 5+ core modules including bill splitting, payment reminders, spending analytics, transaction history, and group management.
- Designed and optimized 15+ reusable React components with dynamic state management and responsive layouts, reducing code redundancy and ensuring compatibility across desktop and mobile devices.
- Built an interactive analytics dashboard featuring monthly expense reports, real-time balance tracking, and 10+ data visualizations, enabling users to monitor spending patterns and manage shared expenses efficiently.

SKILL SWAP

- Developed a frontend web application using React.js, Vite, and JavaScript, featuring 4+ interactive modules including AI-based skill matching, authentication, real-time chat UI, and user profile management.
- Engineered a responsive and scalable interface with 15+ reusable components, implementing dynamic state management, ratings and reviews, and personalized dashboards, resulting in a seamless experience across desktop and mobile devices.

EXPERIENCE & ACTIVITIES

- Developed SkillSwap and Smart Splitter using React.js, Vite, Tailwind CSS, and Chart.js, building 20+ reusable components and analytics dashboards.
- Competed in ICAC Championship and Smart India Hackathon, contributing 350+ lines of code, securing a Top 20% finish, and improving solution efficiency by 10%.
- Contributed to GirlScript Summer of Code (GSSoC) and built a Python-based weather application using APIs, Git, and GitHub.
- Led a social internship at a government school, conducting cybersecurity workshops for 60+ students using AI-powered tools and interactive content.

TECHNICAL SKILLS

- Programming Languages: C, Python, JavaScript
- Data Structures & Algorithms: DSA, Problem Solving, Algorithm Design
- Web Development: HTML, CSS, JavaScript, DOM Manipulation, Responsive Design, React.js, Vite, Tailwind CSS
- Computer Science Fundamentals: Object-Oriented Programming (OOP), Version Control, Software Development
- Tools & Platforms: Git, GitHub, VS Code
- Cloud & Security: Identity and Access Management (IAM), Basic Security Concepts

CERTIFICATIONS & TRAINING

- Google Cloud Cybersecurity Certification
- Introduction to Data Science (INFOSYS SPRINGBOARD)
- Google AI Essentials

LANGUAGES

- English
- Hindi
- Spanish
